

**T & W Apiaries LLC**

**100 % Pure**

**Beeswax Candles**

At T & W Apiaries we are proud to say that our candles are 100% pure beeswax. We do not add fragrances or dyes. They are all natural.

## **Why Burn Pure Beeswax Candles?**

Beeswax candles release negative ions into the air and since pollen, dust, dirt, pollutants and any other junk floating in the air carry a positive charge this causes neutralization of the particles and they fall to the floor. Working like a purifier thus cleaning the air you breathe.

Pure beeswax candles are naturally scented by the honey and floral nectar in the honeycomb they smell great.

Pure beeswax candles also have a high melting point which results in the candles burning longer, 2-5 times longer. The burn time will differ between candles.

Not all pure beeswax candles are created equal. Unfortunately candles only need to contain 51% beeswax to be labeled as a beeswax candle. I assure you that our candles are 100% pure and natural.

At present we offer a 3 inch by 3 inch and 3 inch by 5 inch round pillar, a votive, tea lights and a candle in a tin. All of our candles are hand poured with care.
